Dostępność	Dostępny
Kod producenta	POL950
Kod EAN	849398016121
Producent	Polar Lights

Opis produktu

This **ALL-NEW** kit from Polar Lights continues our popular 1:350 scale lineup. It captures every detail discriminating modelers demand. Nearly every panel and “greebly” detail have been excruciatingly researched and reproduced. It even includes a resin bridge dome to ensure the detail was captured that was shown in the paint-scraping flyby sequence in the film. The kit is engineered to assemble with ease and allow lighting to be installed. A full-color decal and paint guide shows base colors as well as weathering. A step-by-step guide provides clear assembly instructions. It includes a colorful water-slide decal sheet as well as a dome base with a metal support tube.

Kit Features:

- Molded-in near-black and clear
- Skill 2, paint and cement required
- Decal sheet features Klingon logos & markings
- Dome base with metal support tube
- Includes optional resin bridge dome to capture details injected molding can't maintain
- Big 1:350 scale - 2 FEET LONG - STUDIO SCALE - thoroughly researched to match the filming miniature used in STAR TREK: The Motion Picture
- Engineered for lighting
- Full-color paint guide
