Raptor SR dla Autel Evo II [A131S] - antena zwiększająca zasięg - 4Hawks

Dostępność	Dostępny
Kod producenta	A131S
Kod EAN	853854008667
Producent	4Hawks

Opis produktu

- No modification to the drone itself
- Long range extension without external boosters
- Design does not contain any removable parts
- Complete solution
- Controller NOT included

Autel Evo II is perfect for holiday trips. Its long range allows its user to reach places that were earlier completely inaccessible, such as deep forests, canyons, lakes etc. Evo fits in well in every situation. The built-in camera allows recording videos in 4k.

4Hawks antenna for Autel Evo II model is highly advanced, operating in 2.4GHz frequencies. The concept behind the look of the antenna was to make it look like it was a part of the drone by default. Entire construction is 100% UV protected to assure longevity of the equipment. Additionally, part of the construction is made of aluminum to make the whole construction as light as possible. Mounting is made of stainless steel for rock solid stability. Mounting the range extender leads to permanent changes with the remote controller. The entire set is lightweight and uniform (without any loose equipment pieces). Changing the direction of the antenna shouldn't cause any difficulties, as the system was designed in a way that allows quick position change with just a single "click". This way you can be sure that you do not lose the connection with your drone.
