Raptor SR dla DJI Cendence [A117S] - antena zwiększająca zasięg - 4Hawks

Dostępność	Dostępny
Kod producenta	A117S
Kod EAN	853854008445
Producent	4Hawks

Opis produktu

- Concurrent dual band 2.4 & 5GHz
- Long range extension without external boosters
- Design does not contain any removable parts
- Complete solution
- Controller NOT included
- 2 omni stick antennas are not included

The Cendence remote controller is a professional-grade, customizable remote controller designed for full integration with other advanced DJI products like the Inspire 2 and CrystalSky monitor.

4Hawks antenna for DJI Cendence model is highly advanced, operating in both 2.4GHz as well as 5GHz frequencies. The concept behind the look of the antenna was to make it look like it was a part of the drone by default. Entire construction is 100% UV protected to assure longevity of the equipment. Additionally, part of the construction is made of aluminum to make the whole construction as light as possible. Mounting is made of stainless steel for rock solid stability. The entire set is lightweight and uniform (without any loose equipment pieces).

Changing the direction of the antenna doesn't cause any difficulties, as the system was designed in a way that allows quick position change with just a single "click". This way you can be sure that you do not lose the connection with your drone.

DJI Cendence is compatible with DJI Inspire 2 and Matrice 200 series.

Extended Flight Range

Noise removal from other devices

Improved video signal

Adjustable signal direction
