## Raptor SR dla DJI Mavic/Spark [A112S] - antena zwiększająca zasięg - 4Hawks

Dostępność	<b>Dostępny</b>
Kod producenta	<b>A112S</b>
Kod EAN	<b>853854008018</b>
Producent	<b>4Hawks</b>

### Opis produktu

- Concurrent dual band 2.4 & 5GHz
- No modification to the drone itself
- Long range extension without external boosters
- Design does not contain any removable parts
- Complete solution

With DJI Spark you are now able to take your drone everywhere without any need to pack big cases with you. This drone is a fantastic choice for people who require an exceptional drone maneuverability. Its maximum speed of 50 km/h allows you to quickly reach the place or scenery desired to take an incredible picture or record a video.

4Hawks antenna for DJI Spark model is highly advanced, operating in both 2.4GHz as well as 5GHz frequencies with 8 and 10 dBi gain. The concept behind the look of the antenna was to keep the main merits of DJI Spark, which is its compact size. Entire construction is 100% UV protected to assure longevity of the equipment. Additionally, part of the construction is made of aluminum to make the whole construction as light as possible. Mounting is made of stainless steel for rock solid stability. Mounting the range extender leads to permanent changes with the remote controller. The entire set is lightweight and uniform (without any loose equipment pieces). Changing the direction of the antenna shouldn't cause any difficulties, as the system was designed in a way that allows quick position change with just a single "click". This way you can be sure that you do not lose the connection with your drone.

Extend  
flight range
