Opis produktu

Douglas DC-3 (25 size EP-GP)

The **Douglas DC-3** is a fixed-wing propeller-driven It airliner. Its cruise speed (207 mph or 333 km/h) and range (1,500 mi or 2,400 km) revolutionized air transport in the 1930s and 1940s. Its lasting effect on the airline industry and World War II makes it one of the most significant transport aircraft ever made.

Now, VQ ARF's reproduction Douglas DC-3 R/C aircraft, it is designed for both electric motor and glow engine. At its core, this model has a scale outline and features many details not usually found on a sport ARF wood model, especially for the landing gear.

And Most Important, this DC-3 is easy to fly both with electric motor or glow engine.

Specifications:
