Producent	<b>VQ-Models</b>

### Opis produktu

#### **Fly Baby (46 size - Civilian category)**

Homebuilt aircraft have long been a popular way to enter the world of full size general aviation. One of the original homebuilts is the Bower's Fly Baby. The design is as famous in EAA home-built aircraft circles as the Cessna 152 is to general aviation pilots.

This VQ ARF's model is inspired by a full size Fly Baby that has been flown for fun and in air shows all over the midwest! The color scheme is a scale color scheme and looks great in the air! This popular model is great for intermediate pilots looking for a fun and easy "second" airplane now that they've solo'd. For experienced modelers the Fly Baby is fun and easy to fly. You'll want to fly it over and over again.

VQ recognizes today's R/C pilot wants to fly his aircraft with his favorite type power system. This model is designed to accept two stroke, four stroke, and electric power systems. Power it any way you want !

The Fly Baby is convenient too with it's easy access top hatch and two-piece bolt-on wing. Easy to build, easy to transport, easy to fly. You'll love flying the Fly Baby!

#### **Specifications:**

- Wingspan: 1618mm - 63.7in
- Wing Area: 43.55sq.dm - 675sq.in.
- Wing Loading: 73.9g/dm.sq. - 23.9oz/sq.in. (Will Vary with Equipment Used)
